**“Music that Elevates, Connects, and Transforms”**

**Carol Brown:** It is the meeting point between the ethereal and the earthly.

Carol represents song, vibration, and melody — the universal language of music that uplifts the spirit.

Brown symbolizes the earth, the root, and nature — the healing power that connects us to the essential.

As a DJ and producer, Carol Brown builds a bridge between healing frequencies (432 Hz) and the genres Organic House, Afro House, and Progressive House, creating hypnotic, ritualistic, and deep atmospheres.

Her proposal is not only musical but also vibrational and spiritual: each set is a sonic journey that awakens emotions, activates memories, and leads to states of expansion, connection, and inner transformation.

The sound of Carol Brown is a sensory and energetic experience, where every beat is a root and every melody is a flight.

Her music invites you to dance from the soul, to free the body, and to reconnect with nature, the tribe, and the self.
